We are a team of clinicians partnering with the community to ensure optimal mental health management for our clients.

## **About the agency:**

The team of clinicians at Dare to Care Too function collaboratively. Part of our strengths lie in our ability to manage complex cases. We work with a variety of client types both low and high need. We have extensive experience in working with clients with frequent hospitalizations and have been successful in stabilizing and minimizing re-hospitalizations by enhancing symptom management and collaboration.

We have extensive experience and are knowledgeable about resources available to the underserved population. We also collaborate with Medical and other specialty providers. We prefer to see hospitalized clients no later than 7 days from discharge, facilitate same day appointments when needed and provide long-acting injections on site.
